American Journal of Physiology: Gastrointestinal and Liver Physiology

No. 1. JULY 1994

Reduced glutathione modulates Ca^{2+}-mediated damage to rabbit isolated gastric mucosal cells
H. M. Wong and B. L. Tepperman G1

Cholinergic influence on duodenal mucosal bicarbonate secretion in the anesthetized rat
B. Säfsten, G. Jedstedt, and G. Flemström G10

Glucose absorption by a nectarivorous bird: the passive pathway is paramount
W. H. Karasov and S. J. Cork G18

Use of isografts to study proliferation and differentiation programs of mouse stomach epithelia
D. C. Rubin, E. Swietlicki, and J. I. Gordon G27

Nonparallel secretion of GP-2 from exocrine pancreas implies luminal coupling between acinar and duct cells
S. D. Freedman, K. Sakamoto, and G. A. Scheele G40

ATP-$MgCl_2$ administration normalizes macrophage cAMP and β-adrenergic receptors after hemorrhage and resuscitation
P. Wang, S. M. Tait, Z. F. Ba, and I. H. Chaudry G52

Primary culture of salamander intestinal epithelial cells from nests: whole cell Na^+ currents induced by valine
J. F. White G59

Effect of adrenergic and cholinergic agents on esophageal bicarbonate secretion in opossums
B. H. Hamilton, N. A. Tobey, M. C. Starnes, V. J. Schreiner, and R. C. Orlando G67

Rapid reversible substrate regulation of fructose transporter expression in rat small intestine and kidney
C. F. Burant and M. Saxena G71

Protein-mediated transfer of fluorescent-labeled phospholipids across brush border of rabbit intestine
Z. Zhang and J. W. Nichols G80

Membrane physical properties determine cardiac β-adrenergic receptor function in cirrhotic rats
Z. Ma, J. B. Meddings, and S. S. Lee G87

Pentagastrin enhances gastric mucosal defenses in vivo: luminal acid-dependent and independent effects
Y. Nishizaki, P. H. Guth, G. Kim, H. Wayland, and J. D. Kaunitz G94

Characterization of insulin-like growth factor I receptors in human esophageal epithelial cells
R. Vinayek, L. S. Pichney, U. Tantry, S. K. Dutta, J. Resau, and S. Vengurlekar G105

Stimulation of esophageal mechanoreceptors is dependent on rate and duration of distension
P. Nguyen and D. O. Castell G115

Identification of Na^+/H^+ exchange on the apical side of surface colonocytes using BCECF
G. G. King, W. E. Lohrmann, J. W. Ickes, Jr., and G. M. Feldman G119

Vagovagal inhibition of motilin-induced phase III contractions by antral acidification in dog stomach
O. Yamamoto, Y. Matsunaga, N. Haga, and Z. Itoh G129

Biliary excretion of plasma non-transferrin-bound iron in rats: pathogenetic importance in iron-overload disorders
P. Brissot, G. Zanninelli, D. Guyader, J. Zeind, and J. Gollan G135

ET-1 induced alterations of hepatic microcirculation: sinusoidal and extrasinusoidal sites of action
M. Bauer, J. X. Zhang, I. Bauer, and M. G. Clemens G143

No. 2. AUGUST 1994

INVITED REVIEW

Integrative immunophysiology in the intestinal mucosa
M. H. Perdue and D. M. McKay G151

Relaxation responses of the human proximal stomach to distension during fasting and after food
N. K. Ahluwalia, D. G. Thompson, J. Barlow, L. E. A. Troncon, and S. Hollis G166

Role of prostaglandins in angiotensin II-induced gastric vasoconstriction
J. G. Wood, Z. Y. Yan, and L. Y. Cheung G173

Effect of aging on neurotensin-stimulated growth of rat small intestine
B. M. Evers, M. Izukura, S. Rajaraman, D. Parekh, K. Thakore, K. Yoshinaga, T. Uchida, C. M. Townsend, Jr., and J. C. Thompson G180

Enrichment of rab11, a small GTP-binding protein, in gastric parietal cells
J. R. Goldenring, C. J. Soroka, K. R. Shen, L. H. Tang, W. Rodriguez, H. D. Vaughan, S. A. Stoch, and I. M. Modlin G187

Effect of age on induction of hepatic phospho*enol*pyruvate carboxykinase by fasting
H. van Remmen and W. F. Ward G195

Effect of age on the expression of phospho*enol*pyruvate carboxykinase in rat liver
T. Wimonwatwatee, A. R. Heydari, W.-T. Wu, and A. Richardson G201

Mechanism of action of insulin on pancreatic exocrine secretion in perfused rat pancreas
K. Y. Lee, Y. L. Lee, C. D. Kim, T.-M. Chang, and W. Y. Chey G207

Differential production of TNF by Kupffer cells after phagocytosis of *E. coli* and *C. albicans*
J. K. Olynyk, G. M. Matuschak, A. J. Lechner, R. S. Britton, T. L. Tredway, R. O'Neill, and B. R. Bacon G213

Activin A: negative regulator of amylase secretion and cell proliferation in rat pancreatic acinar AR42J cells
H. Yasuda, S. Tanaka, H. Ohnishi, H. Mashima, N. Ogushi, T. Mine, and I. Kojima G220

Mechanism of cholinergic stimulation of glucose oxidation in isolated gastric glands
I. Hernandez and J. Chacin G227

Phosphorylation of pp62 and pp54 src-like proteins in a rat intestinal cell line in response to gastrin
P. Singh, S. Narayan, and R. B. Adiga G235

Molecular basis for somatostatin action: inhibition of c-*fos* expression and AP-1 binding
A. Todisco, V. Campbell, C. J. Dickinson, J. DelValle, and T. Yamada G245

Gastrin regulates histidine decarboxylase activity and mRNA abundance in rat oxyntic mucosa
A. K. Sandvik, R. Dimaline, R. Mårvik, E. Brenna, and H. L. Waldum G254

Copper transport in the Nagase analbuminemic rat
E. J. Vargas, A. R. Shoho, and M. C. Linder G259

Distribution of nitric oxide synthase activity in arterioles and venules of rat and human intestine
K. Nichols, W. Staines, S. Rubin, and A. Krantis G270

Secretin inhibits induction of ornithine decarboxylase activity by gastrin in duodenal mucosa and IEC-6 cells
J.-Y. Wang, S. A. McCormack, M. J. Viar, and L. R. Johnson G276

A volume-activated taurine channel in skate hepatocytes: membrane polarity and role of intracellular ATP
N. Ballatori, T. W. Simmons, and J. L. Boyer G285

Secretion of cysteine and glutathione from mucosa to lumen in rat small intestine
L. J. Dahm and D. P. Jones G292

Diet affects hepatocyte membrane composition, fluidity, and taurocholate transport in suckling rats
D. A. Novak, J. D. Carver, M. Ananthanarayanan, and W. Ray G301

Apical-to-basolateral transepithelial transport of human lactoferrin in the intestinal cell line HT-29cl.19A
T. Mikogami, M. Heyman, G. Spik, and J.-F. Desjeux G308

Mast cells contribute to ischemia-reperfusion-induced granulocyte infiltration and intestinal dysfunction
S. Kanwar and P. Kubes G316

RAPID COMMUNICATION

Differential expression of substance P, somatostatin, and VIP in neurons from cultured myenteric ganglia
J. R. Grider and O. M. Bonilla G322

ANNOUNCEMENTS G328

No. 3. SEPTEMBER 1994

Intestinal myoelectric response in two different models of acute enteric inflammation
R. W. Sjogren, C. Colleton, and T. Shea-Donohue G329

Multistep mechanism of polarized Ca^{2+} wave patterns in hepatocytes
M. H. Nathanson, A. D. Burgstahler, and M. B. Fallon G338

Effect of a Rab3A effector domain-related peptide, CCK, and EGF in permeabilized pancreatic acini
S. Zeuzem, D. Stryjek-Kaminska, W. F. Caspary, J. Stein, and A. Piiper G350

Serotonin induces Cl^- secretion in human jejunal mucosa in vitro via a nonneural pathway at a 5-HT_4 receptor
J. M. Kellum, M. R. Budhoo, A. K. Siriwardena, E. P. Smith, and S. A. Jebraili G357

Different modulation of hepatocellular Na^+/H^+ exchange activity by insulin and EGF
J. Haimovici, J. S. Beck, C. Molla-Hosseini, D. Vallerand, and P. Haddad G364

Palmitate uptake by hepatocyte suspensions: effect of albumin
F. J. Burczynski and Z.-S. Cai G371

Uptake of taurocholic acid and cholic acid in isolated hepatocytes from rainbow trout
C. M. I. Råbergh, K. Ziegler, B. Isomaa, M. M. Lipsky, and J. E. Eriksson G380

Isotonic volume reduction associated with cAMP stimulation of ^{36}Cl efflux from jejunal crypt epithelial cells
R. J. MacLeod, P. Lembessis, and J. R. Hamilton G387

Fibronectin in human gallbladder bile: cholesterol pronucleating and/or mucin "link" protein?
J. F. Miquel, C. Von Ritter, R. Del Pozo, V. Lange, D. Jüngst, and G. Paumgartner G393

Cholecystokinin rapidly activates mitogen-activated protein kinase in rat pancreatic acini
R.-D. Duan and J. A. Williams G401

Regulation of intracellular pH in crypt cells from rabbit distal colon
S. L. Abrahamse, A. Vis, R. J. M. Bindels, and C. H. Van Os G409

Nitric oxide modulates hepatic vascular tone in normal rat liver
M. K. Mittal, T. K. Gupta, F.-Y. Lee, C. C. Sieber, and R. J. Groszmann G416

Rat parietal cell receptors for GLP-1-(7—36) amide: Northern blot, cross-linking, and radioligand binding
J. Schmidtler, K. Dehne, H.-D. Allescher, V. Schusdziarra, M. Classen, J. J. Holst, A. Polack, and W. Schepp G423

Role of 100-kDa cytosolic PLA_2 in ACh-induced contraction of cat esophageal circular muscle
U. D. Sohn, D. K. Kim, J. V. Bonventre, J. Behar, and P. Biancani G433

Direct measurement of free Ca in organelles of gastric epithelial cells
A. M. Hofer and T. E. Machen G442

Can the liver account for first-pass metabolism of ethanol in the rat?
M. D. Levitt, D. G. Levitt, J. Furne, and E. G. DeMaster G452

Inhibition of rat hepatocyte organic anion transport by bile acids
K. Ishii and A. W. Wolkoff G458

$1,25(OH)_2$ vitamin D_3 activates PKC-α in Caco-2 cells: a mechanism to limit secosteroid-induced rise in $[Ca^{2+}]_i$
M. Bissonnette, X.-Y. Tien, S. M. Niedziela, S. C. Hartmann, B. P. Frawley, Jr., H. K. Roy, M. D. Sitrin, R. L. Perlman, and T. A. Brasitus G465

Inhibition of carbon tetrachloride-induced liver injury by liposomes containing vitamin E
T. Yao, S. D. Esposti, L. Huang, R. Arnon, A. Spangenberger, and M. A. Zern G476

Comparison of aldosterone- and RU-28362-induced apical Na^+ and K^+ conductances in rat distal colon
R. B. Lomax and G. I. Sandle G485

RAPID COMMUNICATION

Protein kinase A mediates activation of ATP-sensitive K^+ currents by CGRP in gallbladder smooth muscle
L. Zhang, A. D. Bonev, G. M. Mawe, and M. T. Nelson G494

ANNOUNCEMENTS G500

No. 4. OCTOBER 1994

Downregulation of taurocholate transport by ileal BBM and liver BLM in biliary-diverted rats
J. V. Higgins, J. M. Paul, R. Dumaswala, and J. E. Heubi G501

Effect of protein derivatives on pancreatic secretion and release of secretin and CCK in rats
K. Shimizu, K. Shiratori, S. Watanabe, T. Takeuchi, T.-M. Chang, and W. Y. Chey G508

Evidence for age-associated reduction in acetylcholine release and smooth muscle response in the rat colon
D. Roberts, D. Gelperin, and J. W. Wiley G515

Regulation of PI hydrolysis and cAMP formation by muscarinic M_3 receptor in guinea pig gallbladder
T. Takahashi, S. Kurosawa, and C. Owyang G523

Role of a lymphatic system in glucose absorption and the accompanying microvascular hyperemia
J. M. Steenbergen, J. M. Lash, and H. G. Bohlen G529

Gastric mucosal repair and release of HCO_3^- after damage by 2 M NaCl in cat: role of systemic acid base status
K. Guttu, K. Grong, K. Svanes, and J. E. Grønbech G536

Carrier-mediated electrogenic transport of estradiol-17β-glucuronide in rat liver BMV
M. Vore and T. Hoffman G546

Tumor necrosis factor-α induces c-*jun* during the regenerative response to liver injury
A. M. Diehl, M. Yin, J. Fleckenstein, S. Q. Yang, H. Z. Lin, D. A. Brenner, J. Westwick, G. Bagby, and S. Nelson G552

Nitric oxide attenuates leukocyte-endothelial interaction via P-selectin in splanchnic ischemia-reperfusion
T. W. Gauthier, K. L. Davenpeck, and A. M. Lefer G562

Ileal tone in humans: effects of locoregional distensions and eating
B. Coffin, M. Lémann, B. Flourié, L. Picon, J.-C. Rambaud, and R. Jian G569

Regulation of pancreatic amylase and lipase gene expression by diet and insulin in diabetic rats
A. Tsai, M. R. Cowan, D. G. Johnson, and P. M. Brannon G575

Transcriptional regulation of intestinal hydrolase biosynthesis during postnatal development in rats
S. D. Krasinski, G. Estrada, K.-Y. Yeh, M. Yeh, P. G. Traber, E. H. H. M. Rings, H. A. Büller, M. Verhave, R. K. Montgomery, and R. J. Grand G584

Regulation of cholecystokinin secretion by ATP-sensitive potassium channels
A. W. Mangel, V. Prpic, N. D. Snow, S. Basavappa, L. J. Hurst, A. I. Sharara, and R. A. Liddle G595

Microfluorometric studies of intracellular Ca^{2+} and Na^+ concentrations in normal human labial gland acini
I. H. Valdez, M. Paulais, P. C. Fox, and R. J. Turner G601

Expression of IGF-II and IGF-binding proteins by colon cancer cells in relation to growth response to IGFs
P. Singh, B. Dai, C. Yallampalli, and Z. Xu G608

Developmentally regulated Gb_3 galactosyltransferase and α-galactosidase determine Shiga toxin receptors in intestine
M. Mobassaleh, O. Koul, K. Mishra, R. H. McCluer, and G. T. Keusch G618

Intestinal lipid inhibits gastric emptying via CCK and a vagal capsaicin-sensitive afferent pathway in rats
H. H. Hölzer, C. M. Turkelson, T. E. Solomon, and H. E. Raybould G625

Role of Kupffer cells in the pathogenesis of hepatic reperfusion injury
C. Bremer, B. U. Bradford, K. J. Hunt, K. T. Knecht, H. D. Connor, R. P. Mason, and R. G. Thurman G630

Characterization of cloned rat liver Na^+-bile acid cotransporter using peptide and fusion protein antibodies
M. Ananthanarayanan, O. C. Ng, J. L. Boyer, and F. J. Suchy G637

Influence of mucosal receptors on deglutitive regulation of pharyngeal and upper esophageal sphincter function
G. N. Ali, T. M. Laundl, K. L. Wallace, D. W. Shaw, D. J. Decarle, and I. J. Cook G644

Corelease of neuropeptides from capsaicin-sensitive afferents dilates submucosal arterioles in guinea pig ileum
S. Vanner G650

Effects of gender and pregnancy on hepatocellular uptake of palmitic acid: facilitation by albumin
S. M. Pond, R. A. Gordon, Z.-Y. Wu, R. A. Weisiger, and L. Bass G656

Gastrin effects on isolated rat enterochromaffin-like cells in primary culture
C. Prinz, D. R. Scott, D. Hurwitz, H. F. Helander, and G. Sachs G663

Secretagogue regulation of pancreatic acinar cell protein phosphorylation shown by large-scale 2D-PAGE
M. J. Wishart, G. Groblewski, B. J. Göke, A. C. C. Wagner, and J. A. Williams G676

Mechanisms of transit of lipid mediators of inflammation and bacterial peptides across intestinal epithelia
T. E. Riehl and W. F. Stenson G687

Interplay of somatostatin, opioid, and GABA neurons in the regulation of the peristaltic reflex
J. R. Grider G696

Secretin: a physiological regulator of gastric emptying and acid output in dogs
H.-O. Jin, K. Y. Lee, T.-M. Chang, W. Y. Chey, and A. Dubois G702

Intestinal anaphylaxis: radiation-induced suppression
Y. Harari, D. Kester, E. Travis, J. Wallace, and G. Castro G709

Nerve growth factor promotes neurite outgrowth in guinea pig myenteric plexus ganglia
M. W. Mulholland, G. Romanchuk, K. Lally, and D. M. Simeone G716

Dual pathways regulate neurite outgrowth in enteric ganglia
D. M. Simeone, G. Romanchuk, and M. W. Mulholland G723

SPECIAL COMMUNICATION

Expression of intestinal fatty acid binding protein in intestinal epithelial cell lines, hBRIE 380 cells
G. Halldén, E. L. Holehouse, X. Dong, and G. W. Aponte G730

No. 5. NOVEMBER 1994

Pertussis toxin stimulates hypersensitivity and enhances nerve-mediated antigen uptake in rat intestine
U. Kosecka, J. S. Marshall, S. E. Crowe, J. Bienenstock, and M. H. Perdue G745

Mechanisms of PTH-induced rise in cytosolic calcium in adult rat hepatocytes
M. Klin, M. Smogorzewski, H. Khilnani, M. Michnowska, and S. G. Massry G754

Evidence for an apical, nonregulated protein secretion in pig exocrine pancreas
G. Viau, J. Lainé, F. Levenez, A.-M. Gueugneau, T. Corring, J. Morisset, and D. Lebel G764

Transient stabilization of cholecystokinin A receptor mRNA by glucocorticoids in pancreatic AR42J cells
S. Rosewicz, E.-O. Riecken, and A. Kaiser G772

Bradykinin and FMLP stimulate prostanoid production by adult rabbit colonocytes in culture
L. E. LeDuc, L. Brown, and A. Vidrich G778

Impact of leukocyte-endothelial cell interaction in hepatic ischemia-reperfusion injury
B. Vollmar, M. D. Menger, J. Glasz, R. Leiderer, and K. Messmer G786

Acute stressors stimulate ion secretion and increase epithelial permeability in rat intestine
P. R. Saunders, U. Kosecka, D. M. McKay, and M. H. Perdue G794

Mechanisms coordinating gastric and small intestinal MMC: role of extrinsic innervation rather than motilin
S. A. Chung, O. Rotstein, G. R. Greenberg, and N. E. Diamant G800

Canine salivary secretion from the submaxillary glands before and during retching
N. Furukawa and H. Okada G810

Multiple actions of epidermal growth factor and TGF-α on rabbit gastric parietal cell function
C. S. Chew, K. Nakamura, and A. C. Petropoulos G818

Esophageal myoelectric responses to magnetic stimulation of the human cortex and the extracranial vagus nerve
Q. Aziz, J. C. Rothwell, J. Barlow, A. Hobson, S. Alani, J. Bancewicz, and D. G. Thompson G827

Effect of fasting on the enterohepatic circulation of bile acids in rats
R. Dumaswala, D. Berkowitz, K. D. R. Setchell, and J. E. Heubi G836

Profile of IGF-binding proteins secreted by intestinal epithelial cells changes with differentiation
S. Oguchi, W. A. Walker, and I. R. Sanderson G843

Intestinal myoelectric alterations in rats chronically infected with the tapeworm *Hymenolepis diminuta*
M. B. Dwinell, P. Bass, and J. A. Oaks G851

Regulation of cholecystokinin secretion by bombesin in STC-1 cells
N. D. Snow, V. Prpic, A. W. Mangel, A. I. Sharara, D. C. McVey, L. J. Hurst, S. R. Vigna, and R. A. Liddle G859

Nucleoside diphosphate kinase associated with rat pancreatic membranes regulates CCK receptor affinity
G. T. Blevins, Jr., E. M. A. van de Westerlo, and J. A. Williams G866

Temporal-specific and spatial-specific patterns of neurotensin gene expression in the small bowel
B. M. Evers, J. A. Ehrenfried, X. Wang, C. M. Townsend, Jr., and J. C. Thompson G875

Role of insulin and insulin-like growth factor receptors in regulation of T84 cell monolayer permeability
J. A. McRoberts and N. E. Riley G883

Regulation of Caco-2 cell proliferation by basolateral membrane epidermal growth factor receptors
W. P. Bishop and J. T. Wen G892

Characterization of a Y_1-preferring NPY/PYY receptor in HT-29 cells
P. J. Mannon, S. J. Mervin, and K. D. Sheriff-Carter G901

TGF-β and collagen-α_1(I) gene expression are increased in hepatic acinar zone 1 of rats with iron overload
K. Houglum, P. Bedossa, and M. Chojkier G908

In vivo measurement of feline esophageal tone
S. Mayrand, L. Tremblay, and N. Diamant G914

Free concentrations of intracellular fluorescent anions determined by cytoplasmic dialysis of isolated hepatocytes
S. A. Weinman and L. M. Maglova G922

Fasting enhances taurine transport by rat liver plasma membrane vesicles
D. Berkowitz, P. Hug, R. G. Sleight, and J. C. Bucuvalas G932

Cholinergic nerve-mediated excitation in the guinea pig choledochoduodenal junction activated by distension
F. Vogalis, R. R. Bywater, and G. S. Taylor G938

Developmental regulation and maintenance of inwardly and outwardly rectifying K^+ currents in sheep parotid cells
C. Hirono, M. C. Steward, N. Sangster, P. Poronnik, J. A. Young, and D. I. Cook G947

No. 6. DECEMBER 1994

Regulation of riboflavin intestinal uptake by protein kinase A: studies with Caco-2 cells
H. M. Said, T. Y. Ma, and K. Grant G955

Induction of postprandial intestinal motility and release of cholecystokinin by polyamines in rats
J. Fioramonti, M.-J. Fargeas, V. Bertrand, L. Pradayrol, and L. Bueno G960

Interleukin-1β inhibits gastric histamine secretion and synthesis in the rat
